Coding and App Development Bootcamp

The program aims to provide a comprehensive learning experience for individuals interested in app development. It covers various topics such as programming languages, software development methodologies, and mobile application development. Participants will learn how to design, develop, and test mobile applications for different platforms.

Participants will learn how to work effectively in teams, manage projects, and solve problems. They will also gain practical experience through hands-on projects and assignments. By the end of the bootcamp, participants will have the skills and knowledge required to build their own mobile applications.

- Learning Week
- Self-directed Learning
- Advanced Learning
- Training in Agile Methodologies and Frameworks
- Individual projects and assignments
- Development of Minimum Viable Product (MVP)
- Engagement in Industry
- Leadership and Management
- Off-Site Visits
